THE SHEAHAN LITERATURE SERVICE

Diamonds, Kimberlites, and Related Geology

March 2015

Highlights

Then there's hope a great man's memory may outlive his life… William Shakespeare

One thing I have learned in a long life: that all our science, measured against reality, is primitive and childlike – and yet it is the most precious thing we have. Albert Einstein

Sad News: Fyodor Andreev who was President of Alrosa, OAO from 2009 to 20014. He died Jan. 30, 2015. He was 48 years old. His career is noted on rough-polished as follows:

In 1989, he graduated from the Leningrad State University with a degree in Political Economy. In 2002-2003, he worked as the First Vice-President of Alrosa and was in charge of the company's financial and economic area of business. He returned to Alrosa to head it as the company's President. His team proposed a new strategy and focused on diamond mining and introduced a new system of sales. He resigned in September 2014 due to health reasons.

Geologist Stephen Sparks, who cracked the physics of volcanoes, wins 2015 Vetlesen Prize
Stephen Sparks, a volcanologist at the University of Bristol, will be awarded the $250,000 Vetlesen Prize in a ceremony at Columbia University in June. Sparks helped to bring volcanology into the modern era, and his insights have improved our understanding of volcanic hazards globally. Considered the Nobel Prize of the earth sciences, the Vetlesen Prize is jointly awarded by the G. Unger Vetlesen Foundation and Columbia's Lamont-Doherty Earth Observatory.

The forthcoming 13th SGA Biennial Meeting "Mineral Resources in a Sustainable World" will be organized in Nancy, France, from 24 to 27 August 2015 http://sga2015.blog.univ-lorraine.fr/
Session 7. REE and other mineralization associated to carbonatites and alkaline rocks

The University of British Columbia's Sauder School of Business will launch an Executive MBA in Strategic Mining Management in September 2015 to provide professionals with the integrated business and operational training and broader social and environmental perspectives necessary to lead the industry. The program comes at the request of the sector, which is bracing itself for the demographic shift in leadership as baby boomers retire. The 21-month part-time EMBA was developed jointly by Sauder and UBC's Norman B. Keevil Institute of Mining Engineering with an advisory council of senior mining executives. Taught by leading business and mining faculty and private sector experts, the program is built to provide students with a comprehensive view of the industry and equip them to manage its operational and financial decisions at the highest level.

De Wit , Jelsma, A review of the kimberlites of the Democratic Republic of Congo. (Springer book) Chapter 17 see ref.

Hill, Kopylova, Russell Mineralogical controls on garnet composition in the cratonic mantle. Contributions to Mineralogy and Petrology

Pirajno Intracontinental anorogenic alkaline magmatism and carbonatites, associated mineral systems and the mantle plume connection. Gondwana Research
